Portfolio

EDUCATION

Bachelor of Laws (LL.B.)

Burapha University

2006–2010

CERTIFICATION

Data Science Bootcamp Batch 12

The School of Generalist / DataRockie

2026

TECHNICAL SKILLS

Programming & Databases

Python • SQL • PostgreSQL

Data Engineering

ETL/ELT • Data Pipelines

Data Modeling • Data Quality • Incremental Load

Orchestration & Reliability

Apache Airflow • Monitoring • Troubleshooting

Lakehouse & Big Data

Databricks • PySpark • Delta Lake

DevOps

Docker • Git • CI/CD

LANGUAGES

Thai

English

Turning data into reliable insights that power decisions and strengthen business outcomes.

BODIN KRONGCHON

DATA ENGINEER

ABOUT ME

Data Engineer with hands-on experience in building end-to-end data solutions across E-Commerce, Advertising, Influencer, Campaign, and Payment domains. Proficient in Python, SQL, and modern data engineering tools with a strong focus on data quality, automation, and scalable data pipelines. Skilled in transforming raw data into reliable insights that drive decision-making and business growth.

CORE CAPABILITIES

Data Pipeline Development

ETL / ELT

Data Quality

Data Modeling & Structuring

Automation & Orchestration

BUSINESS DOMAINS

E-Commerce

Advertising

Influencer

Campaign

Payment & Transactions

PROFESSIONAL EXPERIENCE

E-Commerce & Data Operations — Data Engineering Focus

RAVE UP ADTECH AND SOLUTION Co., Ltd.

Aug 2025 – Present

- Consolidated and integrated E-Commerce, Sales, and Advertising data from TikTok Shop, Shopee, Lazada, and spreadsheets for performance tracking, campaign analysis, and reporting.
- Used Python, SQL, SQLite, Excel, and Google Sheets to structure, clean, transform, and validate data from platform exports and spreadsheets into reusable datasets, reducing manual preparation.
- Improved data quality and reduced duplicate records across Influencer, Campaign, Compensation, Sales, and Payment data to increase consistency and reliability.
- Structured and maintained Influencer and Campaign History data, including demographics, followers, engagement rate, compensation, and brand-collaboration history, enabling teams to search and reuse data across campaigns.
- Analyzed Revenue, Orders, Advertising Spend, ROAS-related metrics, Product, SKU, and Campaign Performance to identify trends, high-performing products, and optimization opportunities.
- Translated Campaign, Sales, Advertising, and Product data into insights and recommendations for monthly client meetings.
- Prepared Performance Reports, Dashboards, Presentations, and Brand Progress Summaries for teams, clients, and management.
- Prepared, validated, and reconciled Influencer and Live Commerce payment data by checking duplicates, payment status, work dates, compensation, and payment cycles.

SELECTED DATA ENGINEERING PROJECTS

01	SQL E-Commerce Data Engineering Python • SQL • SQLite • Apache Airflow • Docker • GitHub Actions End-to-end reliability-focused SQL data platform covering multi-source ingestion, incremental loading, idempotency, data quality, freshness checks, monitoring, recovery, and CI/CD.	Key Assets 25 Tables 20 Views 57 Indexes 193 Automated Tests	Completed
02	Influencer Master Data & Campaign Intelligence Python • SQL • PostgreSQL • Data Quality • Entity Resolution Multi-source Influencer Master Data platform with entity resolution, campaign history, data quality controls, reconciliation, and PostgreSQL warehouse.	Key Assets 703 Master Records 2,519 Alias/Provenance Records 155 Tests	Completed
03	Databricks Lakehouse Medallion Pipeline Databricks • PySpark • Spark SQL • Delta Lake • Unity Catalog Bronze to Silver to Gold lakehouse pipeline with incremental processing, CDC concepts, Delta MERGE, SCD Type 2, data quality, troubleshooting, controlled failure recovery, and Spark performance tuning.	Key Assets 5,249 Rows 7/7 Reliability Labs 17 Performance Evidence Records	Completed
