[Portfolio](#)

EDUCATION

Bachelor of Laws (LL.B.)

Burapha University
2006–2010

CERTIFICATION

Data Science Bootcamp Batch 12
The School of Generalist / DataRockie
2026

TECHNICAL SKILLS

Programming & Databases

Python • Pandas • SQL • PostgreSQL • SQLite

Data Engineering

ETL/ELT • Pipelines • Incremental Load

Data Modeling • Data Quality • Lineage

Orchestration & Reliability

Airflow • Monitoring • Recovery

Lakehouse & Big Data

Databricks • PySpark • Delta Lake

DevOps & CI/CD

Docker • Git • GitHub Actions

LANGUAGES

Thai — Native

English — Basic

I turn raw data into reliable, actionable information that supports better business decisions.

BODIN KRONCHON

DATA ENGINEER

ABOUT ME

Data Engineer with hands-on experience working with real business data across E-Commerce, Advertising, Influencer Marketing, Campaigns, and Payment Operations. Uses Python and SQL to consolidate, clean, validate, deduplicate, and structure multi-source data into reusable datasets, reducing manual work and improving data reliability for reporting, analysis, and business decisions.

CORE CAPABILITIES

Data Pipeline Development

ETL / ELT

Data Quality

Data Modeling

Monitoring & Reliability

BUSINESS DOMAINS

E-Commerce

Advertising

Influencer

Campaign Management

Payment Operations

PROFESSIONAL EXPERIENCE

E-Commerce & Data Engineer

RAVE UP ADTECH AND SOLUTION Co., Ltd.

Aug 2025 – Present

- Consolidate TikTok Shop, Shopee, Lazada, sales, and advertising data for performance tracking, campaign analysis, and recurring reporting.
- Use Python, SQL, SQLite, Excel, and Google Sheets to clean, transform, validate, and structure platform exports into reusable datasets, reducing manual preparation.
- Standardize, validate, and deduplicate Influencer, Campaign, Compensation, Sales, and Payment data to improve consistency and reliability.
- Maintain reusable Influencer and Campaign History data—demographics, follower counts, engagement rates, compensation, and brand history—for cross-campaign reuse.
- Analyze revenue, orders, ad spend, ROAS, product, SKU, and campaign performance to identify trends, gaps, and optimization opportunities.
- Turn campaign, sales, advertising, and product data into actionable insights for monthly client reviews.
- Prepare performance reports, dashboards, presentations, and brand progress summaries for internal teams, clients, and management.
- Prepare, validate, and reconcile Influencer and Live Commerce payments by checking duplicates, status, work dates, compensation, and payment cycles.

SELECTED DATA ENGINEERING PROJECTS

01

SQL E-Commerce Data Engineering

Python • SQL • SQLite • Apache Airflow • Docker • GitHub Actions
End-to-end SQL data platform covering multi-source ingestion, incremental loading, idempotency, data quality, freshness, monitoring, recovery, lineage, and CI/CD.

Key Assets
• 25 Tables
• 20 Views
• 57 Indexes
• 193 Automated Tests

Completed

02

Databricks Lakehouse Medallion Pipeline

Databricks • PySpark • Spark SQL • Delta Lake • Unity Catalog
Bronze → Silver → Gold lakehouse with incremental processing, CDC, Delta MERGE, SCD Type 2, data quality, troubleshooting, recovery, and Spark performance tuning.

Key Assets
• 5,249 Rows
• 7/7 Reliability Labs
• 17 Performance Evidence Records

Completed

03

Influencer Master Data & Campaign Intelligence

Python • SQL • PostgreSQL • Data Quality • Entity Resolution
Multi-source Influencer Master Data platform with deterministic entity resolution, campaign history, data quality controls, reconciliation, and a PostgreSQL warehouse.

Key Assets
• 703 Master Records
• 2,519 Alias/Provenance Records
• 155 Tests

Completed
